

IMMEDIATE NEWS RELEASE

October, 2009

Fujihira Industry Co., Ltd. was founded in 1944 with its head office located in Bunkyo-ku, Tokyo, Japan. Fujihira's first business accomplishments include the manufacturing and distribution of medical, veterinary and livestock production instruments as well as livestock equipment. Fujihira has continued to focus significant energy towards the development of additional veterinary instruments, livestock equipment, and agricultural tools and machinery. Through its 60 plus years of business operations, Fujihira has used the latest information and technology to develop new products while enjoying a high degree of trust and respect from their loyal customers.

Fujihira's president Tetsuaki Tsuboi is proud to announce that Fujihira has signed a multiyear distribution agreement with AcuShot Needle Free Inc. of Winnipeg, Manitoba, Canada. "Fujihira has done extensive research in the field of needle-free technology. We have tried many needle-free devices in recent years but have not been satisfied with the consistency and accuracy of the equipment. When we discovered AcuShot Needle-Free technology we felt we had finally found what we were looking for. We have presented AcuShot too many of our customers and industry colleagues including pharmaceutical companies and leading veterinarians and have found their response to be very positive. Fujihira will now proceed with the registration process required for using this technology in Japan." said Tetsuaki Tsuboi.

Cal Funk, Director of Business Development for AcuShot Inc. stated; "We are very proud to announce that Fujihira Industry Co., Ltd. is our exclusive distributor for AcuShot Needle Free technology in Japan. Japan is an important market for AcuShot. We had many conversations with a number of contacts in Japan before entering into this agreement with Fujihira. Fujihira's reputation for excellence and integrity was clearly reflected in each and every conversation we had. Fujihira is the leader in manufacturing and distribution of veterinary instruments, livestock equipment, and agricultural tools and machinery in Japan. We are very fortunate to have them as our representatives."

AcuShot's innovative second generation needle-free technology offers producers;

- Faster, more reliable means of application, reducing labor requirements
- Safer mode of application, through the elimination of needles, and effective safe guard measures incorporated into AcuShot's user friendly design.
- Better economics through improved product efficiency, electronic monitoring system and versatile application options

AcuShot is committed to being the world leader in the design and manufacturing of next generation needle-free liquid injection technologies. AcuShot strives to provide veterinarian and health care industries with revolutionary needle-free equipment choices that enable spot treatment of single patients and mass-vaccination of large populations in a cost effective, efficient and easy to use format.
