

IMMEDIATE NEWS RELEASE

April 2010

**Acushot Inc.** proudly announces that **GEOSANE** has been awarded exclusive distribution rights for France.

Geosane was founded in 2002 and specializes in products and services which address concerns that livestock producers have relating to animal health, disease control, hygiene and nutrition. Geosane employs a staff of highly trained and effective professionals who are able to address animal husbandry concerns for swine, dairy and poultry producers across all regions of French livestock production.

“We are very proud to add AcuShot Needle-Free technology to our product line.” said Christian Bailleul, **General Director and partner in Geosane.** “We have been intrigued by the concept of Needle-Free technology for some time, but have never found an effective way to implement this concept until we found out about AcuShot. We were very pleased with our introduction to this new technology developed by AcuShot. French livestock producers are always looking for ways to improve their overall productivity. Farmers feel AcuShot will be a very helpful in improving their farms productivity and overall financial progress.”

**Cal Funk, Director of Business Development** for AcuShot Inc. stated; “We are very excited to announce that **Geosane** is our exclusive distributor for AcuShot Needle Free technology in France. Geosane’s commitment to working with and developing new technology fits well with our desire to improve injection techniques for livestock producers worldwide.”

AcuShot’s innovative second generation needle-free technology offers producers;

- Faster, more reliable means of application, reducing labor requirements
- Safer mode of application, through the elimination of needles, and effective safe guard measures incorporated into AcuShot’s user friendly design.
- Better economics through improved product efficiency, electronic monitoring system and versatile application options

“It’s a real tribute to the vision and commitment held by **Warren Toles, President** and principal owner of AcuShot and **Jules Poiron, Director of Product Development** and the creator of AcuShot needle-free technology” said Funk.

AcuShot is committed to being the world leader in the design and manufacturing of next generation needle-free liquid injection technologies. AcuShot strives to provide veterinarian and health care industries with revolutionary needle-free equipment choices that enable spot treatment of single patients and mass-vaccination of large populations in a cost effective, efficient and easy to use format.
