

IMMEDIATE NEWS RELEASE

February 9, 2009

Med-Pharmex Animal Health, a sales and marketing company located in Dallas, Texas, signs exclusive distribution agreement for the United States of America with **AcuShot™ Inc.**, a Canadian developer of second generation needle-free technology with offices in Winnipeg, Manitoba, Canada.

Bob Van Schoick, President of Med-Pharmex Animal Health, was quoted as saying; "Med-Pharmex is always looking for innovative companies to partner with; specifically companies that offer new products and new innovative technology. As **Vince Palasota**, our CEO and I learned more about AcuShot we knew it was an obvious fit for us. We congratulate AcuShot, and in specific Jules Poiron, Director of Product Development for AcuShot, and the creator of AcuShot needle-free technology on their vision and commitment to bringing this product to the global market place. "

Med-Pharmex Animal Health is a privately owned sales and marketing company located in Dallas, Texas. Its parent company, Med-Pharmex Inc., is a privately held manufacturing company that originated in 1982 and operates in Pomona, California. Med-Pharmex is pursuing new technologies in veterinary drug formulation and delivery devices. Med-Pharmex recently announced a global partnership with Medincell S.A., a France based company specializing in polymer-based long acting drug development for veterinary and human medicine.

Cal Funk, Director of Business Development for AcuShot Inc. stated; "It's been exciting to witness the advent of AcuShot needle-free technology and its entry into the global market place. So many livestock and poultry producers have commented on how glad they are to finally see a reliable, safe, and cost effective alternative to needles."

AcuShot's innovative second generation needle-free technology offers producers;

- Faster, more reliable means of application, reducing labor requirements
- Safer mode of application, through the elimination of needles, and effective safe guard measures incorporated into AcuShot's user friendly design.
- Better economics through improved product efficiency, electronic monitoring system and versatile application options

"It's a real tribute to the vision and commitment held by **Warren Toles, President** and principal owner of AcuShot and **Jules Poiron, Director of Product Development** and the creator of AcuShot needle-free technology" said Funk.

AcuShot is committed to being the world leader in the design and manufacturing of next generation needle-free liquid injection technologies. AcuShot strives to provide veterinarian and health care industries with revolutionary needle-free equipment choices that enable spot treatment of single patients and mass-vaccination of large populations in a cost effective, efficient and easy to use format.

"The United States is a huge market, and partnering with Med-Pharmex is a great opportunity for us. Bob and his team are well respected and have a great network of connections into the US livestock industry. We are confident that Med-Pharmex will do an excellent job of representing and marketing our technology. We look forward to building on this already strong relationship in the months and years to come" said Funk.
