

IMMEDIATE NEWS RELEASE

January, 2010

Song Jiang Trade (Yantai) CO., LTD has been awarded exclusive rights to the distribution of AcuShot in Shandong, China. Song Jiang, a wholly owned subsidiary of Song Kang GLC of Korea, was formed in March of 2006. Songjiang's General Manager, Paul Moon, has been with the company since its inception. Like its parent company in Korea, Songjiang specializes in manufacturing and distribution of veterinary products including ultrasonic scanners, early disease detection equipment and animal artificial insemination tools and equipment.

"Song Kang GLC has the exclusive rights for the distribution of AcuShot Needle-Free in Korea and has done an exceptional job of introducing this new technology to their market place" said Cal Funk, Director of Business Development for AcuShot. .

"Song Kang has proven to be an excellent partner in Korea, and extending our relationship with Song Kang into China through Song Jiang was a natural extension of our growing relationship" said Funk.

"Song Jiang is committed to continuously researching new innovative products to add to their already extensive list of equipment and services." said Paul Moon, General Manager of Song Jiang.

Song Kang GLC president Seong Oh Won is quoted as saying "Song Kang GLC has worked closely with AcuShot Inc over the last 18 months. We have received approval from the Korean authorities to market AcuShot to livestock producers throughout our nation. We continue to believe in the benefits of AcuShot's second generation Needle-Free technology. We were very pleased when AcuShot granted us permission to market its technology in China"

Cal Funk, Director of Business Development for AcuShot Inc. stated; "We are very excited to announce that Song Jiang is our exclusive distributor for AcuShot Needle Free technology in Shandong Province in China. It's been gratifying to build on our strong relationship with Song Kang GLC and move together, into the Chinese market place.

AcuShot's innovative second generation needle-free technology offers producers;

- Faster, more reliable means of application, reducing labor requirements
- Safer mode of application, through the elimination of needles, and effective safe guard measures incorporated into AcuShot's user friendly design.
- Better economics through improved product efficiency, electronic monitoring system and versatile application options

AcuShot is committed to being the world leader in the design and manufacturing of next generation needle-free liquid injection technologies. AcuShot strives to provide veterinarian and health care industries with revolutionary needle-free equipment choices that enable spot treatment of single patients and mass-vaccination of large populations in a cost effective, efficient and easy to use format.
