

IMMEDIATE NEWS RELEASE

January 2010

Acushot Inc. appoints **Chengdu Taifeng Livestock Advanced Technology Co., Ltd** as their exclusive distributor for Southern China.

Chengdu Taifeng Livestock Advanced Technology Co., Ltd's main products include artificial insemination equipment for swine, measurement tools for pig production, identification tools; farm equipment; insulation equipment; cooling equipment; and many other products related to modern livestock production.

"We are very proud to add AcuShot Needle-Free technology to our product line." said **HUANG CHUAN, General Manager and principal owner of Taifeng.** "We have tried to work with CO2 based systems over the years. We have always found these systems to fall short of our expectations. We were very pleased with our introduction to this new technology developed by AcuShot. Chinese animal farmers are always looking for ways to improve their overall productivity. Farmers feel AcuShot will be a very helpful in improving their farms productivity and overall financial progress."

Cal Funk, Director of Business Development for AcuShot Inc. stated; "We are very excited to announce that **Chengdu Taifeng Livestock Advanced Technology Co., Ltd** is our exclusive distributor for AcuShot Needle Free technology in Southern China. Taifeng's commitment to working with and developing new technology fits well with our desire to improve injection techniques for livestock producers worldwide."

AcuShot's innovative second generation needle-free technology offers producers;

- Faster, more reliable means of application, reducing labor requirements
- Safer mode of application, through the elimination of needles, and effective safe guard measures incorporated into AcuShot's user friendly design.
- Better economics through improved product efficiency, electronic monitoring system and versatile application options

"It's a real tribute to the vision and commitment held by **Warren Toles, President** and principal owner of AcuShot and **Jules Poiron, Director of Product Development** and the creator of AcuShot needle-free technology" said Funk.

AcuShot is committed to being the world leader in the design and manufacturing of next generation needle-free liquid injection technologies. AcuShot strives to provide veterinarian and health care industries with revolutionary needle-free equipment choices that enable spot treatment of single patients and mass-vaccination of large populations in a cost effective, efficient and easy to use format.
